## QUARANTINED IN LONE SIGNAL TOWER

### Seven Railroad Men Are Isolated For Smallpox.

Lewistown, Pa., April 17.—"N. C." block station, a signal tower on the main line of the Pennsylvania railroad, one mile west of Marysville, has been placed under strict quarantine against the spread of smallpox. It was discovered that C. W. Hiltner, the night leverman in the tower, had contracted the malarial, and orders were sent out placing all employees who had frequented the office in the past several days under strict quarantine.

William Donahoe, Marysville; C. O. Myers, Newport; George Heilman, Harrisburg; signalman; George Kauffman and R. E. Smith, Marysville, two levermen, and Adam Smith, mechanical repairman, are also confined to the office, guarded by a bevy of the company's patrolmen.

A boarding car, with sleeping accommodations, will be placed on a siding adjacent to the tower, and the men will be required to make this their home until all danger of a spread of the disease has passed.

Hiltner, whose home is at Duncan, has been ill for several days past, but was under the impression at first that he had measles, and later chickenpox. He visited the pay car on Thursday to secure his wages for the month of March, and all persons with whom he came in contact will be closely watched.

### MIND SHIFTS WITH HER HOSE

Just For That, Girl Is Not a Bride and Fiance Is Deserted.

Seattle, Wash., April 17.—Leonora Murphy, a pretty nineteen-year-old Seattle girl, changed her mind and likewise her stockings. So she and Clyde Rowan, of Astoria, Ore., will not get married, although they had been engaged for four years.

Rowan and the girl were on their way to a minister's house to get married, when the bride-to-be discovered a hole in her right stocking just above the shoe. By the time the two had reached the parsonage she had decided that the hole would show when she knelt before the minister.

In spite of Rowan's protests she bade the minister and Rowan wait until she could go home and change her stockings. But she had not been home more than five minutes before she telephoned Rowan that he and the minister need not wait any longer. She said that while she was changing her stockings she had changed her mind.

**Senator Lodge's Son to Wed Nurse.**  
Boston, April 17.—John E. Lodge, son of Senator Henry Cabot Lodge, is to be married, according to the story of Miss Mary Connolly, a trained nurse, who says she is to be his bride. The engagement is the outcome of a romance begun in the sick room when Mr. Lodge was ill.

**First Woman Slate Producer.**  
Slattington, Pa., April 17.—Miss Mary Unger, of Philadelphia, a daughter of the late John F. Unger, has purchased the Unger slate quarries and factory here and will take possession this month. Miss Unger is said to be the first woman in the slate business in the United States.

## EASTER PARADE AT ATLANTIC CITY

### 200,000 Persons Visit Famous Resort.

### ROLLING CHAIRS IN DEMAND

Harem Skirts Added to Variety of Women's Costumes and Every Tint and Shape Imaginable Could Be Found in Their Hats.

Atlantic City, April 17.—Atlantic City had the greatest parade of its history Sunday. Over 200,000 people swarmed the boardwalk at noon in a brilliant sunlight that flashed on hats and costumes of every hue. A brisk and chilly northwest wind failed to dampen the ardor of the promenaders. At midnight Saturday night every cafe and restaurant on the boardwalk was packed, but the bad weather and fear of storm kept down the seashore population to a figure estimated at 50,000 less than last year. When the sun broke out bright on Sunday, however, a new rush began and by noon crowded trains from Philadelphia and New York had landed enough newcomers in the resort to break all records for Easter.

**Parade Started Early.**  
The big annual Easter parade started early and swelled to its greatest volume after the thousands of devout left the churches, where special services were held. The supply of rolling chairs was exhausted before noon, and a few wily chair pushers who "held out" vehicles, put their use up at auction and reaped big rolls of yellow backed bills. Boardwalk barons doubled the price of their and worried because they didn't have more to lease.

The crowd was orderly and the fine weather that kept them out on the boardwalk hurt the Sunday afternoon business in cafes. The few victims of seductive egg-nogg were generally cared for by the police, and Chief of Police Woodruff declared that the day was one of the most peaceful ever known in the resort. Special squad of police kept the rolling chairs in line and the crowd moving during the rush hours.

Half a dozen harem skirts added variety to the costuming, but the big feature of the day was the coloring of the straw hats worn by women promenaders. Every possible tint could be found in the millinery exhibit.

Outside of the harem skirt squad the freaks on the boardwalk during the day consisted of a woman dressed in white from head to foot, who strolled the boardwalk in a white enameled rolling chair, pushed by a coal black negro in a white suit; an actress lady, who led a bulldog, which carried a pipe in its mouth, and a score or more of male pioneers, who paraded in white hanneled suits, topped by straw hats.

### Jumble of Colors.

In variety and power of color the boardwalk presented the most vivid appearance in its history. Hats of straw shapes that defied descriptive powers even of experts ran riot as to shade, with wild blues and every thing of red predominating.

While many of the costumes were matched from hats to shoes and hose, the greater number appeared to have been picked out by color-blind models or wearers with no attempt at harmony.

Pretty girls in robin blue gowns wore yellow straw hats, while others topped off green coat suits with scarlet "lids" trimmed with pink or yellow straw bows.

The wind, which reached a velocity of nearly thirty miles an hour at noon, played queer pranks with skirts and hats at exposed street corners, and many men were delayed by the wind at the several draught spots on the boardwalk.

Whirling skirts showed every shade of silk hose. Fully two-thirds of the feminine seekers after boardwalk admiration wore low shoes of leather or velvet made to match their sheeny hosiery.

Several hundred automobiles came and made up an afternoon parade on the principal avenues.

### RATS' NEST YIELDS \$650

**Policeman's Find of Bits of Money Pays Off Mortgage.**

Trenton, N. J., April 17.—Patrolman Patrick Kirwick has received word from the treasury department at Washington that the basket of torn money which he found under the floor of his home would only net \$650.

Kirwick fully expected that there would be several thousand dollars in the scraps. However, he says it is at most enough to clear the little mortgage on his home, so he is thankful.

**Sawmill Catches 7-Pound Trout.**  
Middletown, N. Y., April 17.—Probably the record trout for the season was caught by John Hamilton, of Montella, although the law was not yet off. Hamilton runs a sawmill, and he pulled a log out of the water near the mill and commenced sawing it. The log was hollow, and as the saw struck the hollow spot an immense brook trout fell out, flapping on the floor. It measured 27½ inches and weighed seven pounds.

### Catarrh Cannot Be Cured

with LOCAL APPLICATIONS, as they do not reach the seat of the disease. Catarrh is blood or constitutional disease, and in order cure in you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It is prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

Take Hall's Family Pills for constipation

## TELEGRAPHIC BRIEFS.

The motorboat Bre' Fox III, was wrecked and its occupants thrown out while trying for a record run between Cincinnati and Louisville.

Going to the cradle to awaken her ten-months-old son, Mrs. Lloyd Bear, of York New Salem, Pa., found the child dead, though supposedly not seriously ill.

Crossing the street on an errand for his mother, six-year-old Oliver Llewellyn, of Mahanoy City, Pa., was run down by a dray and his skull was fractured and he was otherwise so injured this his death is expected.

The thirty-five-foot channel for the Delaware river was the subject of a protracted discussion at a long table luncheon of the City club in Philadelphia, at which were considered matters relating to the harbor and navigation facilities of the port of Philadelphia.

Caught under a hot flood of molten steel which rained down upon their heads from a ladle above them, eight men, employees of the open hearth department of the Midvale Steel works, at Philadelphia, were so terribly burned that seven of them died. One of the men was killed outright.

United States District Judge Frank Rudkin, in Spokane, Wash., overruled the demurrer of the defendants in the Doughton Alaska land fraud case, taking direct issue with United States Judge Hanford, of Seattle, who decided the same point in favor of the defendants in the Sir Edward Stracey case in Seattle.

Within the next month four agents of the tariff board will begin gathering cost statistics of manufacturing wool and cotton textiles in Europe.

The investigators will work in the European mills several months and return to the United States in time to include their reports in the recommendations on the cotton and wool schedules which the tariff board expects to show to the president in December.

## MAN STOOD ON HIS HEAD ALL NIGHT

### Fell Into Grain Chute Seeking Place to Sleep.

Auburn, N. Y., April 17.—A strange accident that caused its victim to stand on his head all night occurred to Charles Stokes, a laborer.

While seeking a place to sleep in the barn of Attorney John Hunter, he poked his head into a grain chute in the loft and fell forward, diving into the dark tube.

His arms were jammed against his sides and he struck the chaff at the bottom, the softness of which saved him from a broken neck. His shouts were unheard, and after struggling to exhaustion, he gave up the fight and was held a prisoner all night.

Early in the morning Dwight Macomber, a caretaker, found Stokes, and with the aid of the police rescued the man and sent him to the City hospital. He will recover.

## BASE BALL SCORES.

## THE LATEST PARIS FAD.

Come out into the garden, Maud, The onion sweet's in bloom, And Paris, Maud, has lately ruled It is the fad perfume.

Yes, heliotrope is out of style, White rose and violet, too, And jockey club and crab apple—These all you must taboo.

But onion, Maud, is a la mode; It's really recherche! So, dear, just come down to the patch And gather a nosegay.

Rub onions on your rosy cheeks, Wear onions in your hair, And set them round the parlor, Maud, To fragrantize the air.

Then right before your lover calls, Maud, eat a bunch or two, They'll make you irresistible, And he'll propose to you, C. M. BARNITZ.

## KURIOS FROM KORRESPONDENTS

Q. Will you please inform me if I must pay duty on eggs and fowls from Canada and at what rate?

A. Five cents per dozen for eggs, 3 cents per pound for fowls. This is generally paid with the express charges.

Q. My Leghorns have very yellow ear lobes. They are vigorous, lay fairly and were sold to me for pure bred stock. Is this color a sign of mixed blood?

A. No. White lobes turn yellow when fowl gets too much yellow corn or has yellow jaundice.

Q. What does the word "furnished" mean when applied to a fowl?

A. A fowl is fully furnished when it possesses every part with which it was endowed by nature, or if some nature faker has improved on nature and created a new breed and made a standard for that breed then a fowl of that class is fully furnished when it possesses all the parts that standard calls for.

Q. How long may the term chick be applied to a young fowl?

A. Till sex may be distinguished, when it becomes cockerel or pullet, and is thus called until a year old, when it is called cock or hen.

Q. Is it a sign of mixed blood when Leghorns get broody?

A. No. You will nearly always find some Leghorns in a flock that cluck, and the hotter the house the more broodies.

Q. If the air cell in a hatching egg grows too slowly how may I increase it? If too fast how may I decrease it?

A. To increase, decrease supply of moisture or increase supply of air. To decrease size of cell, increase moisture or decrease supply of air.

Q. About what temperature is best for an incubator room? Should incubator eggs be kept in a light or dark room?

A. Sixty to 70 degrees. Dark room the better.

Q. About how many degrees a week should I reduce the brooder heat?

A. If you start at 100 degrees a reduction of 5 degrees per week is all right, the vigor of your stock being always considered, but brooder heat should never stand below 70 degrees.

## FEATHERS AND EGGSHELLS.

Many fail to win at shows because they start conditioning fowls too late. This should begin in time for fowls to catch up to standard weight, replace broken feathers and become perfectly tame.

Many have often wondered whether Peter lost his appetite for chicken after his experience with the cock that crew thrice. Not so, if we judge him by his successors.

Judge Savidge of Sunbury, Pa., advised a husband who was before him for nonsupport to leave town and go back to the farm. Yes, you seldom see the man that sticks to the farm before court or in the poorhouse.

A turkey hen at Muncy, Pa., after raising seventeen poults hatched twenty-four chicks and carefully raised them. For size and vigor they beat all the hen raised broods on the farm. Why? Because Mother Turkey keeps her young away from filth and follows nature's plan.

A friend paid \$100 for stock and made a total failure of his first year because he was sold worn-out birds. His poultry journal guaranteed this advertiser, and the victim presented his case and got a sour lemon with a lump of sugar in it.

If you think snow can take the place of water just set some down in a pan at night where chickens have had only snow all day. They almost drink their heads off. Water is a great item in fattening, and chickens gain much less when they must melt snow to soak their feed.

Why some didn't win is often explained after the show by their statements before. They are too cocksure. A fellow is seldom kicked by a mule because his business end is so well advertised by his he-haw-haw! Like a gun, you don't know when a show's loaded till it goes off.

Much of the poultry grit on the market is inferior because it wears smooth in the gizzard. The best is true crystal. It keeps its cutting edge and, though it breaks up finally in the grinding process, is sharp to the last. We have noticed much salt, seaweed and dirt in certain brands of cracked oyster shell. This shows it was not washed before grinding. You not only pay for waste, but excess salt is apt to cause inflammation in the hen's digestive tract.

You should by all means have a compressed air sprayer for annihilation of fruit tree pests, and what a convenience for destroying mites in a henhouse and for whitewashing! Friend, save time, labor and gray hairs by using labor saving machinery.

**C. M. Barnitz.**

## I Want To Remind

you that I am still in the Cleaning, Dyeing and Pressing business will also take orders for the well known Wanamaker and Brown order made clothes.

Give me a call and you will always come back to

**R. H. BUSHMAN,**  
No. 14 Chambers Street,  
United Phone, Gettysburg, Pa

## SELECTING GOOD BREEDING STOCK.

A gentleman recently suggested that he would like to buy a dairy bull. He said that this animal was to be used on his common cows to grade up the herd, and he did not want to pay very much money, not over \$125 and even less than that if possible, which leads to the question, What is a cheap bull? The man doubtless could have found something for \$75 or \$80. There would probably have been little difficulty in getting a bull that would answer the purpose for breeding his common cows, says Kimball's Dairy Farmer.

On the other hand, suppose this man would spend three times as much money, or \$250, for a bull that was extremely well bred and capable of transmitting to his daughters the milking qualities that predominated in his ancestry. We will suppose that the farmer in question is milking ten cows and that he averages one year with another 50 per cent heifer calves. This means that the first year the bull is used five of his daughters will be added to the herd. Now we will suppose that as soon as they come into milking form they yield fifty pounds more of butter fat per year than their dams. This means that 250 pounds of butter fat will be added to the production of the herd, which at current prices would be worth \$75.

When the second generation begins to milk there will be an income for the year of \$150, and the bull will have brought from the increased milk production alone \$300, or the equivalent of his original cost. When we add to this the value of the heifers that have been added to the herd we see that the high priced bull was an extremely profitable investment. It costs no more to keep him than it does an ordinary animal, and a bull that could be bought for less than \$100, while he may have a pedigree, will naturally be rather questionable as to prepotency, so that very little dependence could be placed upon his increasing the butter fat production of the herd.

The Holstein bull whose picture is herewith shown is Sir Walker Segis 5672, a son of the famous King Segis 3238, Holstein-Friesian Herd book, who has thirty-nine officially tested daughters to his credit at five years of age. Eight of these made records of twenty pounds in seven days as two-year-olds. The records of the dam, grandams and great-grandams of Sir Walker Segis average 24.2 pounds butter in seven days. He is a member of the great Lilian Walker family and is now at the head of the Bairdland herd owned by S. A. Baird & Son, Waukesha, Wis.

tion of the herd. The figures given above are very conservative. They could be twice as large and still be safely within the bounds of reason. On the other hand, when it comes to selling calves, even though they be grades, a high priced bull will pay for himself several times in the better returns that may be secured for such stock.

It takes a farseeing man to really appreciate the possibilities of good stock, for the capacity of the better bull breeds on in accumulative effect upon the herd, while the offspring of the poor bull will never materially improve, and the breeder will find his efforts are leading him down hill instead of up. Paradoxical as it may seem, in buying dairy stock, whether it is heifers, cows or bulls, but especially in the latter case, the high priced animal is usually the cheapest.

## Hoofs Need Attention.

The feet of farm horses need more attention than they usually get. They need frequent trimming and shaping. Sometimes the hoofs will break off unevenly. Such places should be smoothed off with the pinchers and rasp. Better still, they should be trimmed off before they break. Frequently in winter the toe of the hoof has worn faster than the heel. This makes the hoof and ankle break too much in a forward angle and is extremely hard on the joints and tendons in that region. With such feet the heels should be cut and rasped down until they are in proper proportion to the toes. As a rule the heel length should be just half the toe length.

**Silage a Money Saver.**  
The addition of silage to a ration of corn, cottonseed meal and clover hay does not materially affect the rate of gain or the selling price of the cattle, but does decrease the cost of gain from 50 cents to \$1 and even more per 100 pounds. These conclusions seem to be borne out by enough data to make them practically certain.—Indiana Bulletin.

## Political Advertising

For County Commissioner  
**U. H. CROMER**

Subject to the decision of Democratic party.

## Public Sale

OF VALUABLE STOCK and  
FARMING IMPLEMENTS  
THURSDAY, APRIL 20, 1911

The undersigned administrator of the estate of John H. Gilliland, deceased, will sell at the late residence of the deceased in Straban township, Adams county, Pa., on the Carlisle road, 3 miles north of Gettysburg, the following personal property:

12 HEAD OF HORSES and COLTS, 1 Bay mare 6 years old, weighs 1200 lbs., works wherever hitched, safe driver, has been driven by a woman, exceptionally good leader; 1 Brown mare 6 years old, weighs 1300 lbs., works wherever hitched, exceptionally fine beast; 1 Black mare and colt, 7 years old, fine all around brood mare, safe driver; 1 Sorrel mare 10 years old, safe for any child or woman to drive, good all round beast; 1 Bay horse 6 years old, 1 Black horse 4 years old, good worker; 1 Mare colt 1 year old; 1 horse colt 1 year old; 1 Sorrel horse colt 1 year old. These colts are all sired by Sisto and are very promising.

40 HEAD OF THOROUGHBRED DURHAM CATTLE, Reds and Blues, consisting of 14 milk cows, 3 have calves by side, will be fresh by time of sale; 1 fresh in milk; the remainder will be fresh in the Fall; 5 of these cattle are registered in the American Short-Horn Breeders' Association, 1 a bull, registered as Bonnie Burns, 315831, he is not related to the following cows, also registered; Gettys Lass 77566; Gettys Lass 2nd, 77567; Gettys Lass 3rd, 77568 and Gettys Lass 4th, 77569; they are reds and blues and are suitable for breeding together; 6 thorough bred heifers, 15 months old, some have been bred to Bonnie Burns, No. 315831; 6 heifers 9 months old, 1 eligible to registering; 2 red bulls 15 months old; 2 steers 1 year old, the balance are calves and young stock, anyone wanting to start in thoroughbred Durham cattle have an opportunity not often available.

10 HEAD OF POLAND CHINA HOGS, 1 make hog, 2 brood sows, remainder shoats weighing from 30 to 90 pounds.

FARMING IMPLEMENTS. 1 Gas tractor engine, lettered T. T., high dome, this engine is as good as new, has been used little more than for work on this farm; 1 J. I. Case threshing machine, with canvas drag and also an extra wind stacker with machine; a complete automatic weighing machine, this thrasher is well equipped for custom work; 100 ft. 6 in 4-ply Gandy belting, new; 1 J. I. Case water tank and truck, capacity 12 barrels, new; also tank pump and hose all complete; 1 Blizard Ensign cutter with traveling feed table, four knives, this cutter is new; 1 pony hand feed cutter; 1 mowing mill; new harpoon hay fork and rope complete, an exceptionally long rope; platform scales, weigh 600 lbs., 20 ton wagon scale, Fairbanks; one Sprout, Walder & Co. French broom chipping mill and corn sheller complete, self loader for four bags, this will be sold separately if desired; Line shafting, pulleys and belting to make this a complete mill, capacity 50 bushels per hour; good new corn sheller with fan attachment; 80 ft. of new 6 inch 4-ply Gandy belting; 6 mill picks; grain bags; 1 Walter A. Wood 7 ft. cut binder used one season, cut but one crop; 1 binder cover; 2 Walter A. Wood mowers, one has cut but 10 acres of grass, the other used only one season, both new; 1 hay tedder, good; 1 new horse rake, 12 ft. Osborn; 1 Oswego steel skin Bucks Co. gear wagon, capacity 5 ton, 4 inch tread; new; 1 good heavy narrow tread wagon; 1 4 inch tread wagon; 1 2 horse Webster wagon; 1 set of 4 inch low down wheels; 2 horse made wagon beds, one 14 ft. well ironed; one 11 ft. bed suitable for 2 horse wagon; 3 pair of hay ladders, 18, 20 and 22 ft. long; 1 Kenup manure spreader, capacity 50 bu.; 3 riding corn cultivators, 1 Albright used but a short time; 2 Hench & Dromgold workers; Empire grain drill in good running order; new bob sled; 4 long plows; 2 Syracuse and 2 barshaws; 2 Perry spring harrows, new; Clark cut-away harrow with iron frame; land roller; horse cultivator; Hoosier corn planter; double and double shovel plows; good falling top buggy; 1 buggy; 14 horse power domestic gasoline engine in good running order; 20 ft. of line shafting with pulleys of different sizes; green bone cutter; circular saw frame with 24 inch saw; grind stone, with belt power, also hand grind stone; emery stone. Following blacksmith tools: Combination anvil, vice, drill press and bits; good iron vice for bench; blacksmith forges, hammers, tongs, chisels and hards.

V. P. & Gen. Mgr. G. P. A.

## WHEN CARE SAVES PROFITS IN SHEEP.

When lambs are expected provide warm quarters for the ewes, deeply bedded with straw. Allow no one or any dog to frighten the sheep at any time now, for a sudden fright is likely to either cause premature birth or at least to have bad effects on both ewe and offspring, writes C. E. Davis in Farm and Fireside.

Go to the lambing house every hour until bedtime, and be ready to assist any ewe that needs it and to attend to the youngsters. If possible it is a good plan to sleep near the sheep yard and look in on them several times during the night. As soon as a lamb is dropped wrap the tiny bunch of bones in warm cloths until dry and well warmed, then unwrap and nestle it in the straw. The mother will do the rest. Within six hours see that it takes nourishment from the ewe. This takes patience and often some teaching, but it pays to persist.

As soon as the ewe has dropped the lamb or two give her a bucket of milk warm water, for the act of lambing will leave her very thirsty. The drink will soothe her nerves, quiet her anxiety, and she will give down her milk freely and chew her cud contentedly. Cold water would be very hurtful, if not fatal, at this time.

When lambs are due separate such ewes from the rest of the flock to prevent injury and keep them in the fold where you can watch them every hour. It pays to let other things wait rather than be careless now and see all your year's profit fall and die. I have known sheep owners to turn

The splendid Cheviot ram shown above was a prize winner in the eastern circuit of fairs last fall. The Cheviots are a mountain breed, hardy and do fairly well where pasture is scant. They have been successfully produced in New York, Pennsylvania, North Carolina, Indiana, Iowa and other states. The mutton is of superior quality. The fleece of the ewes weighs six to eight pounds. This ram was bred by A. F. White of Steuben county, N. Y.

pregnant ewes out in the pasture and lose three to five lambs that were born away out in the field, were chilled and died of neglect.

Always speak low and gently to the ewe at this time, for a sheep knows by your voice if you are angry or joyous, and it is the singing shepherd they love.

If you get the lamb safely over the first forty hours it is likely to grow all right after that, but warmth, care and attention must be there when needed. If three are born to one ewe, as I have had happen, you must raise one with nipple and bottle or else get another ewe that has lost her own lamb to adopt the odd triplet.

Not Guilty.  
Poor Tweedledum was in trouble. He was up before the local magistrate. "Officer," demanded the dispenser of justice, "read the charge." Mumbleton's chest expanded. "Obstructing the traffic by causing a large crowd to assemble in Ditchwater street on the 20th inst., yer worship."

"And defense?" rapped out his worship, turning to Tweedledum. Tweedledum cleared his throat. "Sir," he replied, "I happened to appear in my front garden wearing a tie my wife bought me for my birthday, and it got about that I was going to give a comic entertainment. That is all."

## RECIPROCITY'S FATE IN DOUBT

Success Depends Upon "Favored Nation" Clause.

## HARD SLEDDING IN SENATE

Canadian Bill is Slated to Pass the House This Week, But Will Meet Opposition in Upper Body.

Washington, April 17.—The fate of the Canadian reciprocity bill, scheduled to pass the house this week, may depend upon the administration's interpretation of "the most favored nation clause" in our treaties with other countries.

Although few members of the senate have heretofore expressed doubt that a majority of that body will vote to ratify the agreement made between President Taft and the Ottawa government, it now appears that the possibility that the concessions given to Canada under the terms of that agreement might be extended to any other country would gravely jeopardize the Underwood bill and might result in its defeat.

The sudden appearance of this unexpected complication results from the attitude of Senator Cummins, of Iowa. No one man is likely to wield greater power and influence in the senate during the next two years than he, the man generally recognized as the ablest and most resourceful of the little band of Republican "insurgents," who, if they work in accord, can absolutely dominate the situation in the upper house of congress.

Senator Cummins is in favor of reciprocity with Canada provided its scope is extended so as to lower or remove the duties on agricultural implements and other manufactures which the farmer buys as well as upon what he sells, as provided for by the agreement in its present form. But Senator Cummins wants this freer trade restricted to Canada. He does not propose to have the bars let down, for instance, between this country and Argentina, so as to permit the free access to our markets of meat products from the latter country.

Senator Cummins, therefore, insists upon an assurance from the president that if the administration will not accede to the view which other countries are considered very likely to press upon us, namely, that they are entitled under the most favored nation clause to receive the same tariff concessions which we propose to grant to Canada.

It is true that the customs court of appeals recently decided that the most favored nation clause in our commercial treaties with other countries did not apply to the proposed agreement with Canada. But Senator Cummins says that he has been unable as yet to get the assurance he desires from either the president or Secretary of State Knox that they will follow the decision of the court in case the scope of the reciprocity bill is enlarged as the Iowa senator proposes to enlarge it and in case other nations demand equal treatment.

This is one of the indications that the Underwood bill will have hard sledding in the senate. Senator Cummins looks to see the Democrats make an effort to couple with it the "farmer's bill" enlarging the free list of the Payne-Adams law by more than a hundred articles. If such an effort succeeded the reciprocity bill could, of course, become repugnant to the administration and would, therefore, be almost certain to fail.

Then account is also to be taken of the opposition of a number of Republicans who regard the Canadian pact as a dangerous step toward free trade, although the general opinion is that they will not carry that opposition to the extent of voting against the president.

Whatever the outcome of the three-cornered battle which will begin in the senate this week or shortly afterwards, there is a general agreement that the session will be a prolonged one.

## TWELVE BACKS BROKEN

These Patients in Miners' Hospital Are All Young Men.

Ashland, Pa., April 17.—A part of the toll in human suffering caused in a region where the largest part of the population is engaged in working in the mines is indicated by the fact that twelve young men are patients in the state hospital here with broken backs.

There is little or no hope for any of them, although in several of these cases the surgeons are making every effort to save the lives of their patients. But whatever degree of success they may attain, the men thus injured will never be fitted again for active physical employment.

## Memorial to Hymn Writer.

Mainfield, N. J., April 17.—As a memorial to the late Rev. Dr. Robert Lowry, famous as a gospel hymn writer, a large bronze tablet was unveiled at the Park Avenue Baptist church, of which he was pastor for many years.

Ottawa Has Six Inches of Snow.  
Ottawa, Ont., April 17.—Ottawa woke up Sunday morning to find the city covered with six inches of snow and a small blizzard raging and with a lower temperature than has ever been known here at Easter.

## DEDICATE SHAFT TO FRENCH WAR HEROES

Taft to Attend Ceremonies at Annapolis Tomorrow.

Annapolis, Md., April 17.—An event of international interest will take place here tomorrow afternoon, when a monument to the memory of the French soldiers and sailors who lost their lives in the Revolutionary War will be unveiled.

President Taft and the French ambassador, M. Jusserand, have signified their intention to attend, and both will deliver addresses. Several members of the president's cabinet and other high government officials will accompany the president.

The monument, which was erected by the general society of the Sons of the Revolution, is a plain pink granite shaft, fifteen feet high, with bronze tablet, symbolically decorated, set in, and stands on an elevation at the rear of St. John's college campus.

The shaft will be unveiled by Miss Amelia de Pau Fowler, of Baltimore, who is a direct descendant of Admiral de Grasse, the commander of the French fleet at the siege of Yorktown.

## THE AEROPLANE IN WAR

Aviator Would Not Be Safe Within 1000 Yards of Battleship.

Washington, April 17.—The life of an aviator would not be safe if he approached within 1000 yards of the deck of a modern battleship.

This is an official deduction from recent experiments held at the last target practice on the southern drill grounds off Cape Henry, Va., when a team of bluejackets from the battleship Mississippi fired at a box kite. The three-inch guns of the torpedo defense battery are used an aeroplane would not be able to approach within 1000 yards of a battleship. During the recent practice, however, it was impossible to use the three-inch guns because they couldn't be inclined at an angle of elevation high enough to permit firing at the kites.

The ordnance officers of the Mississippi are considering the necessary modification of the gun mount for this kind of attack. It is probable that further experiments will be held later, at which the smaller caliber guns will be tested in firing at box kites at different ranges.

## GIRL AS BARN BURNER

Confesses Starting Blaze in Employer's Property.

Bridgeton, N. J., April 17.—Before Justice of the Peace Lore, Katie Di-mano, twelve years old, was held for court, charged with deliberately firing the barns of Sigmund Tepper, of Carmel.

It was shown that the fire resulted in a loss of \$1500. The little girl had confessed that she started the blaze because she "wanted to see the fire burn." The home of the child is in Philadelphia, but she has been employed in the Tepper family for nearly a year.

## Scruples Cause Suicide.

Allentown, Pa., April 17.—Believing that he was not spiritually prepared to be confirmed, Charles Trexler, eighteen years old, driven frantic by some imaginary sins, committed suicide by shooting himself with his father's revolver. During the last few months he had become deeply religious, but protested his unworthiness.

J. JERE PLANK

Administrator.

or, John D. Keith, Attorney.

## WARNED NOT TO FIRE ON DOUGLAS

Americans in Auto Bear Order to Federal Leader.

## NEW BATTLE IS RAGING

Diaz's Troops Caught Between Two Bodies of Rebels, Who Far Outnumber Them — Railway Connection With U. S. Being Cut.

Agua Prieta, Mex., April 17.—Insurrecto leaders report that a battle was begun east of Cabullona, fifteen miles south of this city. The federal troops engaged are said to have been caught between two bodies of rebels, who far outnumbered the federals.

After a conference with Colonel Shunk, commanding the American troops in Douglas, Ariz., Colonel Medina, the insurrecto jefe of Agua Prieta, permitted an automobile carrying two Americans to pass through the rebel lines toward the federal camp. The Americans in the automobile, which flies the American flag, are James T. Williams, of Tucson, formerly United States civil service commissioner, and Charles McKean, formerly of the United States army.

McKean has been officially commissioned by Colonel Shunk to carry a written message to Reynaldo Diaz, in command of the federal force. McKean and Williams proceeded directly to the camp of the federals and delivered the message to Diaz. Diaz accepted the message and assured McKean that every precaution would be observed to prevent firing into Douglas.

Railroad officials of the connecting lines in the United States believe that before the week's end Mexico City and all of northern and central Mexico will be cut off from all communication with the outside world save by the seaports of Vera Cruz and Tampico and the lines connecting those two cities with the interior.

The line of the National railway entering the United States at Laredo, Tex., and passing down through Monterrey and Saltillo to Mexico City, now the only avenue out of Mexico to this country remaining open, was temporarily cut near Vanegas, in the state of San Luis Potosi, and rebels are reported to be moving on a half dozen strategic points along the line south of the border, with the purpose of stopping traffic on this last of the international commercial channels.

## Forty Rebels Killed in Battle.

Chihuahua, Mexico, April 17.—In a battle fought between Sauz and Santa Clara Canyon, about fifty miles north of here, according to federal counts, forty or more insurrectos were killed and over one hundred wounded. Federal reports five killed, but developments may change the figures.

## TELEGRAM STOPS FIGHTING

Peace Message From Washington Sent Leader of Mexican Rebels.

El Paso, Tex., April 17.—The insurrectos have retired from the vicinity of Juarez and the federals have returned to the city. The federals lost six killed, including two lieutenants, and twelve wounded, including one captain.

The insurrectos retired on receiving a message sent down from the El Paso junta by courier. The message came to El Paso by wire from Dr. J. Gomez, confidential agent of the insurrectos in Washington.

It is stated that the doctor is now in communication with Mexico City relative to conditions on which peace may be secured, and that all fighting must cease.

The message was addressed to Francisco I. Madero himself. Whether it reached him is not known, but the El Paso junta officials don't believe that he is close to Juarez.

## EXPECT MANY U. S. FARMERS

Immigration This Year Said to Break All Records.

Ottawa, Ont., April 17.—Immigration from the United States this spring is going to break all records, according to information in the possession of the Canadian immigration department and the Canadian railroads.

The Canadian Pacific railway announced that it had definite information as to 45,000 United States farmers who have engaged transportation for themselves and their effects, which include live stock, farming machinery, building material, seed, etc., the total value of which is estimated to be \$15,000,000.

## Receipts in P. O. Banks Increase.

Washington, April 17.—In a statement made public by Postmaster General Hitchcock it is shown that \$201,951 was on deposit at the forty-eight postal savings banks at the close of business March 31, as compared with \$133,869 on the last day of February, an increase of \$68,082.

## Soldiers to Panama Canal.

Washington, April 17.—The United States soon will expend approximately \$2,000,000 in fitting up officers' quarters and barracks along the Panama canal for housing 6300 troops that the war department will dispatch to protect the canal. This force will be known as the "Canal Guard."

## Women's and Misses

SEVERAL good varieties of strawberry, dewberry, blackberry, red and black raspberry plants for sale. C. G. Shank, Biglerville.

Eat Ziegler's bread.

## Catarrh Doctor

Cures Catarrh, Acute or Chronic, or Money Back.

Would you pay one dollar to rid yourself of disgusting catarrh?

Then go to The People's Drug Store to-day and ask him for a Hyomei outfit and you will not only engage, but you will own outright a little catarrh doctor that has cured more cases of catarrh than all the catarrh specialists on earth.

In the \$1.00 box which contains the Hyomei outfit, you will find a little hard rubber vest pocket inhaler.

Into this inhaler you pour a few drops of Hyomei. Then all you have to do is breathe through the little inhaler, either through the nose or mouth, according to where the catarrh is located.

When you breathe HYOMEI you breathe a powerful yet soothing, antiseptic air, which as it passes over the inflamed and germ ridden membrane penetrates every fold and crevice, and destroys germs completely.

Stomach dosing never cured catarrh, sprays and douches always fail; and why? because they don't get where the germs are, and as catarrh is a germ disease you must kill the germs, before you can cure catarrh. HYOMEI is guaranteed by The People's Drug Store and druggists everywhere to cure catarrh, coughs, colds, croup and sore throat.

## Cures Indigestion

A 25-Cent Box of English Marhue Speedily Puts the Stomach in Shape.

People's Drug Store, with characteristic enterprise, has succeeded in landing the agency for English Marhue, the new successful remedy for all stomach ills.

If the dyspeptics of Gettysburg take as kindly to English Marhue as dyspeptics in other cities have, there will be a larger number of comfortable stomachs in town than ever before.

Think of getting for only 25 cents a remedy that will banish all stomach misery in a few days. But English Marhue does more. It tones up the system, purifies the blood and clears the complexion.

Try it for Neuralgia, dizziness, night sweats and nervousness. Mail orders filled, charges prepaid, by Rheuma Co., Buffalo, N. Y. Write for free trial box.

Rheuma cures Rheumatism or money back. 50 cents at People's Drug Store. Mailed by Rheuma Co., Buffalo, N. Y.

## Foot Torture

Rub on Ezo and the Pain and Burning and Aching will Vanish.

Foot misery is now a thing of the past. It matters not how sore your feet are, or how swollen or painful, one rub with Ezo will make them feel fine and comfortable.

The People's Drug Store is the agent for Ezo in Gettysburg and every reader of the Gettysburg Times who has any foot troubles ought to get a twenty-five cent jar to-day.

Ezo is a different foot remedy: it is a refined ointment which is quickly absorbed by the pores and soothes and heals the inflammation. It quickly takes the agony out of corns and bunions and makes the feet strong.

Ezo is a good thing to have on hand at all times, nothing better for smarting, chafing or itching skin. For use after shaving, for burns, sunburn, rough hands, eczema, blackheads and redness of the nose. Ezo. 25 cents at The People's Drug Store.

Ezo Chemical Co., Rochester, N. Y., Makers.

## AUNT SALLY'S CIRCUS

By M. QUAD  
Copyright, 1910, by Associated Literary Press.

Aunt Sally Davidson had reached the age of sixty-five and was living with a married daughter. She was a little, brisk old lady, and the care of two squalling young uns: all the household work fell on her shoulders. She could walk a mile with any one, and the Monday washing was always out before noon.

Aunt Sally was noted for her patience and good temper, but there came a day in this her old age to try her soul. A circus was coming to town, and to the utter amazement of her daughter, son-in-law and all others she expressed a determination to be a spectator.

"Why, ma, you are a member of the church!" exclaimed the daughter.

"So I am, but don't members of the church want to see a rhinoceros and giraffe?"

"And your minister will preach against the whole thing," added the son-in-law.

The circus was a week away yet, and during that time the matter was brought up again and again, but Aunt Sally stuck to her resolution.

The day of the circus came at last, and after a hasty dinner Aunt Sally donned her sunbonnet and freshly ironed calico dress and hid her way to the circus grounds. One last appeal was made to her as she was ready to go. The daughter had a red flannel petticoat that had been worn only three winters. This was offered up as a sacrifice, but was rejected. Son-in-law and daughter were so angry that they stayed at home. It was believed that Aunt Sally had borrowed the necessary half dollar somewhere, but in this they were mistaken. She was going without money and depending on Providence to see her through.

We who have depended on the same thing know in advance what answer Aunt Sally got when she walked softly up to the ticket takers and, putting on her most winning smile, said:

"Will you please let a poor old woman in to see the anaconda forty feet long?"

She was, of course, laughed at and told to go hence. "Hence" wasn't very far with her. In walking around the big tent she saw a boy crawl under the canvas, and she lost no time in following suit. She rose up among the benches and took a seat, and if any one ever enjoyed a circus it surely was she. She didn't miss a hand-spring, and when the performance was over she lingered and inspected the animals until turned out. On her arrival home she was met by sulky looks, but nothing dampened her happiness. She came near going over to the minister's to repeat some of the clown's jokes and ask where the wickedness came in, but had to be satisfied with saying to the daughter:

"May, I want to go to heaven with the rest of you, but as sure as you live if another circus comes along I'll attend it and have just as good a time as I did today!"

Next morning the early risers of the village were treated to a rare spectacle. Aunt Sally was out on the grass in front of the house in scant attire turning handspindles or trying to. She made pretty fair work of it until her son-in-law came out and carried her into the house, where she was given an awful lecture on the enormity of her offense, but she failed to realize the enormity part.

"Look here, now," she said in reply. "I'm sixty-five years old, and I've got to keep limbered up to be worth anything around the house. We've got a lot of goose grease down cellar, and I'm going to rub myself all over and keep at this handspinning business. I'll soon be able to do more work."

"I'll leave the house if you do!" threatened the son-in-law.

"I'll send for the minister to talk to you!" added the daughter.

"Children, I've got to limber up or my knees will soon be like sticks. I ain't doing nothing to disgrace nobody, and I shan't stop for the minister. I wish I could borrow a bareback boss of somebody. I think I'll go over and ask Demcon Peagram for his old gray mare."

After breakfast off she went, and as she couldn't get the horse she came back home to arm herself with a clothes pole and attempt to walk the top rail of a six rail fence. She couldn't be carried in this time, and the son-in-law ran for the person. The good man left his sermon unwritten and came on the trot. Aunt Sally waved her hand to him and fell off the fence and turned cart wheels around a large circle. Not until she was out of breath and had kicked her heels high in the air was she got into the house. Then the person began to tell her how awful it was, but he had gone the wrong way about it.

"If I can't go to heaven and the circus, too, then I'll keep up these tricks," said Aunt Sally as she set her jaw.

"But think of the wickedness! Will I go to heaven or not?"

"You know what it says about the wicked."

"Yes, but will I get there or be kept out?"

"If you repent—"

"But I don't. I have done nothing to repent of. Parson, it's either heaven or more limberness!"

"Well, being 'tis you, yes."

And although Aunt Sally quit her "limberness" she attended three more cruises before she died, and her tombstone bears the legend, "Gone to Her Reward."

The season is at hand when the neighbors' hens constitute a perplexing problem with the one who takes pride in a well kept flower or vegetable garden.

A few days ago a shipload of dressed sheep were sold on the San Francisco market in prime condition. They were brought under refrigeration from Australia, a distance of 7,000 miles, and paid a duty of 5 cents a pound.

### BROODY BIDDY AND HER REQUIREMENTS.

Selection is the magic word in poultry culture and refers not only to picking out birds for breeders, but pertinently applies to the broody hen, her eggs and her nest.

Apply it to eggs and you will not set antiquies, dories nor freaks in shape nor size, but fresh, medium, normal eggs, thirteen to the hen before May and fifteen later.

Not just any hen will do. Brahmas, Cochins and Langshans are rather clumsy. Rocks, Dories,

FAITHFUL BIDDY.

Reds and Orpingtons are about the best. Hens crossed with Leghorns, Hamburgs, Minorcas, Spanish, Anconas, seldom sit steady. The clutch should be good sized, clean shanked, vigorous, hot blooded, gentle and anxious to sit anywhere.

Otherwise she may die on the nest, leave her eggs or rear culls.

Not just any nest will do. Small, very deep or public nests mean mixed eggs and omelets.

Try the style shown. It is O. K. and twenty-one inches every way.

Fill with wheat straw. Let Biddy shape it for eggs, then turn against wall, cover the top, let hen out once a day for feed and return her before eggs are cold and expect a big hatch if eggs are fertile.

Better test eggs the seventh day to be sure of fertility, and set two hens at same time to be sure of one full hatch at least, one to be set over in case of failure.

Where should nest be located? Not in the damp, where hens get intestinal colds; not on high, where they break eggs.

Cut out that damp cellar fad and sod from the bottom of the nest, for under natural incubation eggs get little outside moisture and that most from the hen, so give Biddy a clean, quiet nest on a dry floor and have no

HER REWARD.

empty nests around for her to get into by mistake. Lastly, treat Biddy well. Handle her gently, keep her free from lice, furnish a sunny dust bath for her to roll in, feed her lots of whole corn, flanked with sharp grit and pure water, and she will have an undisturbed digestion.

Under such conditions incubation is no strain, but a rest cure.

It assures a big hatch of dandy chicks and a mother in fine fettle to raise them to a splendid maturity.

### DON'TS.

Don't feed capons whole grain right after operation. Soft mash for hash.

Don't buy chickens with bubbles on their nose. Catarrh.

Don't thaw frozen eggs and sell them to your best trade, and watch for the eggs that slip under the nest straw.

Don't put the roost up near the roof unless your roosters are frost proof. Their breath will freeze above their backs, and you will have rump germs by stacks.

Don't make roosts high, but low and level. Fit to the feet and edges bevel.

Don't beat your water vessel with a lamp. Heat the hens with sound feed and exercise. Thus get eggs and avoid a conflagration.

Mites in the henhouse are a hard proposition, but persistent warfare against them will win out.

A child should be taught not only how to do a thing thoroughly, but how to do it in the quickest and easiest manner possible as well.

The hen that does not have grit of some kind in her gizzard is in about the same pickle as the fellow who has lost his own molars and has not had them replaced by a set from the dentist.

## THE GRANGE

Conducted by  
J. W. DARROW, Chatham, N. Y.,  
Editor of the New York State Grange Review

## WORK OF GRANGES

Facts Concerning Co-operative Buying and Selling in the Various States.

The Grange Declaration of Purpose Says, "We Purpose Meeting Together, Talking Together, Buying Together, Selling Together and in General Acting Together as the Occasion May Require."

State Master Stetson of Maine in his annual address said: "Intelligent co-operative buying and selling is a fundamental principle in our grange work. It is a term applied to a system of united effort for commercial and industrial purposes. It is the association of people for the management of commercial interests and for the benefit of those associated. The advantage of active co-operation comes in the lower prices paid for articles used in the home and on the farm and for the increased price received by selling the products of the farm directly to the consumer."

Co-operative trade since the foundation of the Order has always been a prominent feature of the grange work. Years ago grange stores were more numerous than now. And yet we find a few of these in the various states that are doing a large business, but co-operation is mostly carried on by county and subordinate granges within their own membership, and they greatly profit thereby. Co-operative selling must be largely of a local nature. It can be most successfully carried out by subordinate and Pomona granges. For instance, some of the Pomona granges of Maine have realized this and are at work selling together, with the following as their motto: "First, the expansion of both foreign and domestic products in Maine; second, to obtain and disseminate seasonable information regarding the crops abroad that come into competition with their home grown products, so that the Maine producer may more intelligently decide whether to sell or hold his crops for higher prices; third, to devise and carry out a proper system of marketing products whereby a maximum price shall be obtained with minimum cost in selling."

The Connecticut Patrons' Exchange is doing a substantial but not very large business, amounting perhaps to \$10,000 per year. But even at that it is saving many good dollars to members.

In Michigan the granges are very active in a business way. A single grange in the fruit belt purchased 5,000 pounds of copper sulphate, two carloads of lime and a carload of sulphur and a ton of paris green. Another grange in the same state placed a single order for a ton of paris green. Trainloads of binder twine are purchased every year by grangers. Another grange purchased \$7,000 worth of flour and feed.

In Ohio the state grange through its trade contracts handled \$50,000 worth of farmers' commodities. The fertilizer business constituted \$25,433 of this amount, making a saving of fully \$1,250 on fertilizers.

One grange store in Kansas carries goods to the amount of \$140,000, and the granges in that state are doing a large co-operative business. The executive committee of the state grange is working on plans for a state wide co-operative buying agency. One grange insurance company in that state has a membership of 4,167 and carries risks to the amount of \$11,659,216. The cost on each \$1,000 of insurance was \$1.90.

In New York state several hundred thousand dollars in trade is handled by trade contracts, and the county and subordinate granges are saving their members hundreds of dollars on farm supplies. Nearly every grange state where the grange membership is in considerable numbers is making this co-operative trade a most profitable feature. Pennsylvania is especially notable for its co-operative fire insurance companies, telephone companies and particularly for co-operation in erecting grange halls.

Farmers everywhere are learning that they can succeed best by working together, and co-operative enterprises established by farmers not members of the Order of Patrons of Husbandry are also numerous and profitable. For instance, the Puyallup and Summer Fruit Growers' association of Washington state has 700 members and shipped last year over 62,000 crates of red raspberries and nearly 20,000 crates of blackberries. Its own canning plant using 20,000 crates of raspberries and 44,000 crates of blackberries. Ten years ago its output did not exceed 5,000 crates. Now it is over 200,000 crates. This association was organized with a capital of \$2,000 in 2,000 shares.

At Voltaire, N. D., the farmers own several co-operative enterprises. Indeed, they own the town site and a telephone line. They own an elevator on which last year a dividend of 20 per cent was declared. They have a farmers' mutual fire insurance company. They organized a stock company and constructed a building.

There are almost innumerable ways in which farmers may co-operate if they are willing to work together for their common interests.

While fish make their homes in water they must have oxygen, which is always found in fresh water. It is a lack of this element that causes the death of fish in many a shallow pond and lake during the winter season when the water freezes to a considerable depth and prevents its purification by contact with the air.

A few drops of lemon juice in the water in which rice is boiled will help to keep the kernels whole. Plenty of water is another requisite.

## MAINTENANCE OF COUNTRY ROADS

Way Rural Highways Should Be Cared For.

### CONDITIONS IN HILLY SECTIONS

Get a Decent Grade If You Must Zigzag It—Take Roads Out of Creek and Branch Beds and Keep Them Out. Drainage Is the Most Essential Feature of Any Road.

In speaking of country highways in his county J. H. Murray, county highway engineer of Douglas county, Mo., gives many interesting facts which may be of help to many counties in the country where similar conditions prevail. He says:

We need so many things done and have so little to do with that one hardly knows where to begin. We need the right of way cut out, bridges and cul-

ROAD IN HILLY COUNTRY.

[Courtesy Good Roads, New York.]

verts built, ditches cut, roadbeds crowned and steep grades eliminated. And as we make roads we want to use the drag as one of the best means of improving and maintaining them.

If you have given a roadway along your farm and it is thirty feet wide through your best land, it is only a fraction less than an acre along your forty acres and is perhaps yielding you tenfold the greater profit of any acre in the forty. You should be a promoter of happiness and prosperity, not a "knocker."

In a hilly country we must be governed by the topography. Try to cross the high ridges in the lowest gaps; get a decent grade if you must zigzag to do it.

The most essential feature of any road is drainage. Without good drainage it is impossible to maintain a good road. All other road work depends on this for success. Make your road in such shape that it will shed the water. The surfacing is the roof.

CROSSING A CREEK.

[Courtesy Good Roads, New York.]

You must get a tight roof and dry cellar. Give the water a chance to run off.

I want to give some tables made by careful trial and observations. Here is one:

EFFECTS OF GRADES UPON THE LOAD A HORSE CAN DRAW.  
Level earth road in best condition, 3,000 pounds.

	Pounds.
1 per cent grade.....	2,880
2 per cent grade.....	2,776
3 per cent grade.....	2,680
4 per cent grade.....	2,592
5 per cent grade.....	2,512
10 per cent grade.....	2,304
15 per cent grade.....	2,080
20 per cent grade.....	1,840

Of these given forces (resistance of friction, collision and gravity) that of gravity stands alone, constant in relation to the load. It is constantly drawing you back and with a force proportional to the incline as shown in the accompanying table:

RESISTANCE OF GRAVITY ON DIFFERENT GRADES.

(The following table is practically correct for all grades given. To make it apply to conditions as met with we will assume that the load consists of wagon, 1,200 pounds, and corn, 1,800 pounds, amounting to 3,000 pounds.)

	Pounds.
1 per cent grade, force of gravity.....	30
2 per cent grade, force of gravity.....	60
5 per cent grade, force of gravity.....	150
10 per cent grade, force of gravity.....	300

This is always constant regardless of the condition of the road.

It seems to me idle to talk about making good roads without reducing the excessive grades. It has been said "a road is as good as its worst mile."

On a good earth road, not the best, a team should draw 5,000 pounds. If now we meet with a hill of, say, 10 per cent steepness the effect would be to reduce the above figures to something like one-third, or to 1,700 or 1,800 pounds, and your team actually loses effective strength on these uphill pulls.

Many daughters—of capable mothers is this especially true—do not accept household responsibilities because they are neither expected nor allowed to do so.

**SPLIT LOG DRAG.**  
A split log drag will make the road impassive to water provided it is used in wet weather and is not too sharp.

## Easter Shoes and Clothing

Let your Easter Shoes be Ralston's or Fellowcraft. You will get a new pair of Shoes to go with that new Spring Suit—of course. If you use the same care in buying your shoes that you show in picking out that becoming suit, your choice will be Ralston's or Fellowcraft. Also a full line of Oxfords for women and children.

**MEN'S and YOUNG MEN'S SUITS**

All the popular shades of the season are included such as Blue and Black Serges, Fancy Gray, Steels and new shades of Tan. Also a large line of neat Worsteds in every shade.

Boy's Easter Suits from \$1.50 up.

**O.H. LESTZ,** Corner Centre Square and Carlisle Streets.
